Pump Repair Service

Our experienced technicians perform a thorough series of tests.
Including; noise level, temperature, ultimate vacuum and motor draw.

After our evaluation and your approval, the repair process begins.

Standard Services Include; Install major service kit and inspection for wear on major components.

Extended Services Include; Standard services with additional replacement of major components after customer approval.

On-site Repair

Leveraging the expertise in pump repair amassed over 15 years in the business, VacSolutë offers on-site repair and customizable maintenance programs designed to increase your uptime and productivity. Most importantly, we strive to provide solutions to make your vacuum pumps and processing tools run longer for less cost.

The Vacsolutë Advantage

This repairing starts with proper application engineering to apply the appropriate pump to the process. We help you find the right tool for the job. It continues with our concentrated effort to provide a comprehensive failure analysis report on your pump when you send it in for a rebuild. It sums up in the long-term cost of ownership reduction and maintenance cost avoidance.

VacSolutë has a full rebuild facility in Vadodara and technicians stationed at several different customers around the country.

Vacsolutë offers the following specialty coating services -

- ✓ PEEK - Poly Ether Ether Ketone
- ✓ PTFE
- ✓ PFA
- ✓ Electroless Nickel
- ✓ Nickel+PEEK
- ✓ Xylan
- ✓ Defric

Annual Maintenance Agreements

Ensure maximum equipment uptime at the lowest overall cost

In the face of limited resources and cost-cutting requirements, many pump users are looking for smart ways to avoid expensive repairs and emergency callouts. With an Annual Maintenance Agreement (AMA) from VacSolutë, you can ensure maximum equipment uptime for the lowest overall cost. Think of it as a kind of insurance.

What is an AMA?

An Annual Maintenance Agreement is a cost-effective service contract from VacSolutë, tailored to meet your specific requirements and budget. A VacSolutë AMA includes at least one scheduled inspection and/or maintenance visit per year, which will identify any potential weaknesses in your system and provide the opportunity to take action to resolve the issues before they lead to a breakdown.

Tailoring a maintenance agreement to your specific requirements is a good way to save money.

The VacSolutë Advantage

We know the Vacuum Technology at its level best. Our engineers have many years of experience of on-site diagnosis, service, and repairs. We can also carry out visits to provide advice on fault finding, cost-saving or even environmental recommendations to help you reduce downtime, ultimately saving your business money and helping to look after our planet.

If a service technician encounters an unusual problem that requires specialized support, he has fast and easy access to VacSolutë's vast network of experts.

Benefits

- 1-4 scheduled inspection/maintenance visits per year performed by our experts
- Equipment status report provided after each inspection
- Priority service on all repairs (both planned and emergency) by authorized service technicians
- Unscheduled service callout availability with 24-hour response guarantee for emergencies
- Use of genuine parts in all repairs
- Favorable pricing on parts, upgrade equipment and any additional service hours required during the contract period
- Free telephone support
- Predictable yearly maintenance costs that make budgeting easier.

The bottom line

With an AMA from VacSolutë, you no longer have to worry about the condition and performance of your vacuum pumps and systems. The risk of breakdown is very low and in the unlikely event of failure you are just a phone call away from the qualified help you need to solve the problem quickly and cost-efficiently.

Are your vacuum pumps over warranty?

Choose from a wide range of packages from VacSolutë AMA and operate worry free. From quarterly inspection visits to emergency breakdown visits, VacSolutë AMA covers all your maintenance issues and ensures high uptime of your critical pumps.

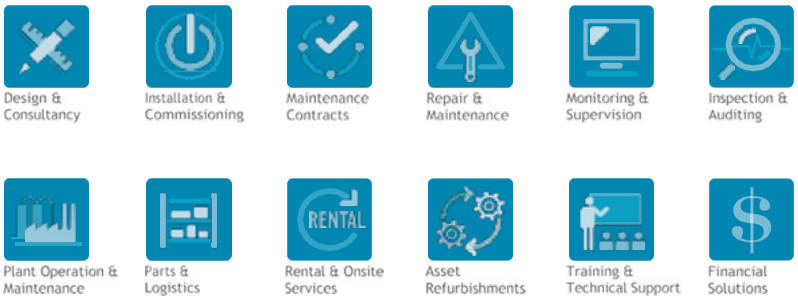

Do you need to know more about your equipment status before you make your decision?

Consider starting with a one-off inspection of the vacuum pumps at your site(s). We will provide you with a report of our findings and recommendations that will help you decide what your next step should be in terms of maintenance and repair.

Is energy consumption a major concern at your facilities?

Ask your VacSolute representative about Complete Care Energy Audits, a service that can help you identify ways to significantly reduce your energy costs.

VacSolutë CompleteCare Services

VacSolutë Complete Care is a comprehensive, integrated portfolio of services designed to ensure that your vacuum system keeps running at its best. Our team of knowledgeable and highly skilled technicians pride themselves on their ability to help customers optimize their operations by providing the right solution every time.
